Welcome to Becton Hospital and Outreach Team

We provide education for students with medical, psychological and emotional issues such as depression, social anxiety and school phobia. We also offer educational and mentoring support for teenage mothers for a period of twelve weeks. At present we are situated in a small residential setting in Nether Edge. It is quiet and friendly, providing a safe and calm environment to help students work on their anxieties and resilience skills. With this help and support, our goal is for students to return to either a mainstream setting or an alternative provision.

Our Aims

Every student at BHOT has an entitlement to the highest standards of education. We believe that every young person should be equipped with the right skills to reach their full educational potential. In order to achieve this we aim to:

- Provide a broad and balanced curriculum focused on the core subjects of English, Maths and Science linking with previous mainstream learning experiences
- Support students to make and maintain academic progress
- Provide learning opportunities to develop life skills such as resilience and enrichment
- Foster a safe, secure and nurturing environment in which students feel their needs are catered for and their opinions and ideas valued
- Work in close partnership with parents, carers and other agencies such as schools and CAMHS to contribute to the wellbeing of our students
- Support students to re-engage with education by providing small classes, reintegration into mainstream and supporting applications to post 16 education.

Our Staff

We have subject specialist Teachers, Higher Level Teaching Assistants and Learning Mentors. Each student is allocated a Learning Mentor who is available to talk through issues, support with college applications and visits and offer group or 1-1 sessions as appropriate.
Our Curriculum

There are 25 hours of study available at Moncrieffe, concentrating mainly on the core subjects. We also offer lessons in Humanities, PSHE, Enrichment, Food and Art.

There are also sessions 2.15pm – 3.30pm catering for younger students in Y7 and Y8

- Resilience group works with students to promote self-esteem and confidence. We provide a safe space to share experiences, offer support and problem solve, with an aim to break down barriers to learning.

- PSHE and Enrichment – Our PSHE and Enrichment programme promotes the spiritual, moral, cultural, mental and social development of students. Students have the opportunity to take part in new activities, learn new skills and understand the importance of a healthy, safe lifestyle.
